

EBENEZER TUTU AINOO

Location: Takoradi, Ghana
Github: github.com/Phavour-EBEN

Email: ainooebenezer05@gmail.com
Mobile: +233-559-662-971

PROFILE SUMMARY

- Software Engineer with experience in AI systems, backend development, and embedded technologies.
- Skilled in building scalable APIs, deploying machine learning models, and developing intelligent applications using Python and modern ML frameworks.
- Experienced in integrating AI solutions with production systems and collaborating within multidisciplinary teams to deliver real-world solutions.

SKILLS SUMMARY

- Languages:** Python, SQL, JAVA
- Frameworks:** Scikit, NLTK, SpaCy, TensorFlow, Keras, Pytorch, Django, Flask, FastAPI, NodeJS
- Tools:** Docker, GIT, PostgreSQL, MySQL, SQLite
- Platforms:** Linux, Web, Windows, Arduino, Raspberry, AWS, GCP
- Soft Skills:** Leadership, Event Management, Public Speaking, Time Management

EXPERIENCE

- FinAuthShield Inc** Remote
AI / Backend Engineer (Full-time) Aug 2025 - Feb 2026
 - Developed AI-powered backend services for intelligent decision-support systems using Python and FastAPI
 - Built a production-ready pharmaceutical AI assistant by fine-tuning the (Qwen 2-1.5B) LLM using LoRA and PEFT
 - Designed REST APIs to integrate AI services with mobile and web applications
 - Implemented monitoring and evaluation frameworks to ensure reliability and safety of AI-generated responses
- University of Mines and Technology – Tarkwa, Ghana** On-Premise
IoT & Embedded Systems Engineer Sept 2024 - Present
 - Collaborate on IoT and intelligent systems research projects focused on embedded computing and mobile application integration
 - Developed hardware–software systems using Arduino microcontrollers, Raspberry Pi, and multiple sensor devices.
 - Designed and integrated sensor-based data acquisition systems for monitoring and automation tasks.

PROJECTS

- Integration of AI and IoT for Fire Safety Detection Systems – Grant Project):** Developed anomaly detection and fire prediction models using sensor data (smoke, temperature, CO, LPG, humidity, flame) to enable early alerts and improve fire response times. And designed and deployed a Flask API for serving the trained models, enabling seamless integration with the frontend interface used by fire personnel.
- FacePassX – AI-Powered Face Verification System:** Developed a 1:1 face verification system using deep learning with cosine similarity to match real-time face scans against stored embeddings. Integrated the AI model with a Flutter mobile application for real-time verification and identity retrieval. Enable fast and secure user authentication with reduced risk of fraud and improved access control.
- Movie Recommendation System:** Developed a content-based movie recommendation system using Natural Language Processing (NLP) and vectorization techniques. Implemented TF-IDF and cosine similarity to suggest movies based on user preferences. Built with Python, Pandas, Scikit-learn.
- AI-Powered GitHub Issue Generator — Independent Project:** Designed and deployed a full-stack AI application that converts requirement documents into structured GitHub issues, reducing project planning time by 80%. Built a RESTful backend API (9 endpoints) using FastAPI to handle document parsing, AI inference, and GitHub repository integration

VOLUNTEER EXPERIENCE

- Aaenics UMaT Robotics Club – AI Lead** Tarkwa, Ghana
Conducted online and offline technical & soft-skills training impacting over 3000 students. Jan 2025 - Jan 2026
- Geek Byte - AI/ML Instructor / Trainer** Ghana, Remote
Trained and mentored learners in Python programming, data handling, and introductory machine learning. Oct 2025 - Jan 2026

EDUCATION

- University of Mines and Technology (UMaT)** Tarkwa, Ghana
Bachelor of Science - Computer Science and Engineering Jan 2023 - Nov 2026
Courses: Operating Systems, Data Structures and Algorithms, Artificial Intelligence, Machine Learning, Networking, Databases

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- Google Foundation: Data Analysis
- Introducing Generative with AWS, Udacity
