Machine Learning

Ebenezer Tutu Ainoo

AI/ML Engineer | Robotics & AI Tutor | Certified AWS Cloud
Practitioner

Takoradi, Western Region, Ghana

Summary

I'm Ebenezer Tutu Ainoo, a passionate AI and machine learning specialist dedicated to creating impactful solutions for real-world challenges. With a degree from the University of Mines and Technology, I've built expertise in Python, OpenCV, and frameworks like TensorFlow, applying them to innovative projects like an automated core logging system for mining and an assistive lens for the visually impaired. My work blends technical precision with a commitment to sustainability, whether in healthcare, mining, or accessibility-focused technologies.

Through hackathons, mentorship programs like IndabaX Ghana, and initiatives such as the SPE DSEAT Datathon, I've honed my ability to collaborate and turn research into practical outcomes. I'm driven by a curiosity to push the boundaries of AI and a desire to connect with like-minded professionals to drive meaningful impact. Let's connect to explore how we can innovate together!

Experience

University of Mines and Technology, Tarkwa

1 year 7 months

IoT Engineer

September 2024 - Present (1 year 7 months)

Tarkwa

- Started as an IoT Engineer / Researcher, collaborating on software engineering projects with a strong focus on mobile application development and intelligent systems.

- Gained hands-on experience working with Arduino microcontrollers, Raspberry Pi, and a wide range of sensor devices for embedded and IoT-based solutions.

- Designed, tested, and integrated hardware–software systems for real-world problem solving.

Robotics & AI Engineer

October 2025 - November 2025 (2 months)

Tarkwa

- Participated in setting up and operating an AI & Robotics Laboratory, including server setup, system configuration, and lab infrastructure for experimentation and learning.

- Built and assembled multiple robotics systems from scratch, including:

- .2D printers (full mechanical and electronic assembly)

- .Robotic kits and automation systems

- .Motor-processor–based robots

- .Robotic hands and crawler robots

- Collaborated in multidisciplinary teams to prototype, test, and improve robotic systems.

- Developed practical skills in robotics assembly, electronics, embedded programming, and AI-driven experimentation.

Geek Byte

AI/ML Instructor / Trainer

October 2025 - January 2026 (4 months)

Greater Accra Region, Ghana

Trained and mentored learners under Geek Bytes, delivering hands-on instruction in Python programming, data handling, and introductory machine learning concepts, with a strong focus on practical projects and real-world application.

Teaching Approach:

- Project-based learning

- Real-time coding demonstrations

- Guided assignments and deadlines

- Code reviews and feedback

- Encouraging best practices and clean code

Aaenics Engineering LTD

2 years 8 months

AI Lead, Aaenics UMaT Robotics Club

January 2025 - January 2026 (1 year 1 month)

UMaT, Tarkwa

I lead AI projects from ideation to deployment

Mentor members in ML, DL, and cloud integration

Coordinate community initiatives and research directions

Member, Aaenics UMaT Robotics Club

June 2023 - August 2025 (2 years 3 months)

Contributed to AI projects, engaged in research and discussions, collaborated with team members on machine learning and deep learning activities, Opencv and mediapipe Proectts

CodeAlpha

Artificial Intelligence Engineer

December 2024 - January 2025 (2 months)

Lucknow, Uttar Pradesh, India

CodSoft

Artificial Intelligence Engineer

December 2024 - December 2024 (1 month)

West Bengal, India

Some major duties are

- Data Collection and Preprocessing
- Model Training and Evaluation
- Research
- Documentation

Projects

- Recommendation system
- Ruled-Based ChatBot
- Face Detection and Recognition

PentaTech IT Solutions

Back End Developer

September 2024 - November 2024 (3 months)

Ghana

Contributed to backend development projects by designing and implementing efficient APIs and server-side logic.

Collaborated with the team to enhance system performance and ensure seamless integration with front-end components.

Gained hands-on experience in technologies like node.js, Express.

I improved my debugging skills, and developed a deeper understanding of scalable backend systems.

Ghana Ports and Harbours Authority

Computer Networking

October 2023 - December 2023 (3 months)

Takoradi, Western Region, Ghana

Education

University of Mines and Technology, Tarkwa

· (2022 - 2026)

Stanford University School of Medicine

Fundamentals of AI/ML in Precision Medicine Certification, Artificial Intelligence/ Machine Learning · (November 2024)
